

MONA STÅHLE PUBLICATIONS 2015**Peer-reviewed articles**

Checa A, Xu N, Sar DG, Haeggstrom JZ, Stahle M, Wheelock CE. Circulating levels of sphingosine-1-phosphate are elevated in severe, but not mild psoriasis and are unresponsive to anti-TNF-alpha treatment. *Scientific Reports* 2015; 5.

Cheung L, Fisher R, Kuzmina N, Li D, Li X, Werngren O, Blomqvist L, Stahle M, Landen NX. Psoriasis skin inflammation modulates microRNA expression of subcutaneous adipose tissue - a missing link between psoriasis and co-morbidities? *Journal of Investigative Dermatology* 2015; 135: S4-S4.

Girolomoni G, Griffiths CEM, Krueger J, Nestle FO, Nicolas JF, Prinz JC, Puig L, Stahle M, van de Kerkhof PCM, Allez M, Emery P, Paul C. Early intervention in psoriasis and immune-mediated inflammatory diseases: A hypothesis paper. *Journal of Dermatological Treatment* 2015; 26: 103-112.

Kamleh MA, Snowden SG, Grapov D, Blackburn GJ, Watson DG, Xu N, Stahle M, Wheelock CE. LC-MS Metabolomics of Psoriasis Patients Reveals Disease Severity-Dependent Increases in Circulating Amino Acids That Are Ameliorated by Anti-TNF alpha Treatment. *Journal of Proteome Research* 2015; 14: 557-566.

Laasonen L, Gudbjornsson B, Ejstrup L, Iversen L, Ternowitz T, Stahle M, Lindqvist U. Radiographic development during three decades in a patient with psoriatic arthritis mutilans. *Acta Radiologica Open* 2015; 4.

Li D, Wang A, Meisgen F, Grunler J, Catrina S, Stahle M, Landen NX. MicroRNA-132 supports wound healing by enhancing inflammatory-proliferative phase transition. *Journal of Investigative Dermatology* 2015; 135: S64-S64.

Li DQ, Li X, Wang AX, Meisgen F, Pivarsci A, Sonkoly E, Stahle M, Landen NX. MicroRNA-31 Promotes Skin Wound Healing by Enhancing Keratinocyte Proliferation and Migration. *Journal of Investigative Dermatology* 2015; 135: 1676-1685.

Li DQ, Wang AX, Liu X, Meisgen F, Grunler J, Botusan IR, Narayanan S, Erikci E, Li X, Blomqvist L, Du L, Pivarsci A, Sonkoly E, Chowdhury K, Catrina SB, Stahle M, Landen NX. MicroRNA-132 enhances transition from inflammation to proliferation during wound healing. *Journal of Clinical Investigation* 2015; 125: 3008-3026.

Lohcharoenkal W, Harada M, Loven J, Landen NX, Stahle M, Sonkoly E, Arsenian-Henriksson M, Grander D, Pivarsci A. MiR-203 is suppressed in poorly but not well-differentiated cutaneous squamous cell carcinomas and regulates the expression of MYC oncogene. *Journal of Investigative Dermatology* 2015; 135: S18-S18.

Lohcharoenkal W, Zhang L, Landen NX, Stahle M, Girnita L, Sonkoly E, Pivarsci A. Anti-tumor effect of an epithelial microRNA, miR-203, in melanoma. *Journal of Investigative Dermatology* 2015; 135: S20-S20.

Lysell J, Tessma M, Nikamo P, Wahlgren CF, Stahle M. Clinical Characterisation at Onset of Childhood Psoriasis - A Cross Sectional Study in Sweden. *Acta Dermato-Venereologica* 2015; 95: 457-461.

Martini E, Wiken M, Stahle M, Eidsmo L. Epidermal Langerhans cells and dermal dendritic cells produce distinct and complementary cytokines that sustain the skin Inflammation in active psoriasis. *Journal of Investigative Dermatology* 2015; 135: S37-S37.

Meisgen F, Srivastava A, Landen NX, Stahle M, Pivarcsi A, Sonkoly E. MiR-146a, a microRNA overexpressed in psoriasis, is a potent regulator of IL-1 beta - induced inflammatory responses in keratinocytes. *Journal of Investigative Dermatology* 2015; 135: S24-S24.

Meisgen F, Srivastava A, Landen NX, Stahle M, Pivarcsi A, Sonkoly E. MiR-146a, a microRNA overexpressed in psoriasis, regulates IL1 beta-induced production of inflammatory mediators in keratinocytes. *Journal of Investigative Dermatology* 2015; 135: S6-S6.

Nikamo P, Lysell J, Stahle M. Association with Genetic Variants in the IL-23 and NF-kappa B Pathways Discriminates between Mild and Severe Psoriasis Skin Disease. *Journal of Investigative Dermatology* 2015; 135: 1969-1976.

Nititham J, Taylor KE, Gupta R, Ahn R, Lee KM, Chen H, Liu J, Seielstad M, Ma A, Bowcock AM, Criswell LA, Stahle M, Liao W. Meta-analysis of the TNIP1 region in psoriasis identifies two independent association signals. *Journal of Investigative Dermatology* 2015; 135: S76-S76.

Nititham J, Taylor KE, Gupta R, Chen H, Ahn R, Liu J, Seielstad M, Ma A, Bowcock AM, Criswell LA, Stahle M, Liao W. Meta-analysis of the TNFAIP3 region in psoriasis reveals a risk haplotype that is distinct from other autoimmune diseases. *Genes and Immunity* 2015; 16: 120-126.

Srivastava A, Lohcharoenkal W, Li D, Meisgen F, Landen NX, Stahle M, Pivarcsi A, Sonkoly E. MiR-146a, a MicroRNA overexpressed in psoriasis, is a potent regulator of inflammatory responses in keratinocytes. *Experimental Dermatology* 2015; 24: 986-986.

Srivastava A, Meisgen F, Landen NX, Stahle M, Pivarcsi A, Sonkoly E. MicroRNA-146a is up-regulated in psoriasis keratinocytes and is induced by IL-36 alpha. *Journal of Investigative Dermatology* 2015; 135: S74-S74.

Stahle M. Psoriasis: in between the skin and the fat. *Experimental Dermatology* 2015; 24: 181-182.

Svedbom A, Dalen J, Mamolo C, Cappelleri JC, Mallbris L, Petersson IF, Stahle M. Increased Cause-specific Mortality in Patients with Mild and Severe Psoriasis: A Population-based Swedish Register Study. *Acta Dermato-Venereologica* 2015; 95: 809-815.

Svedbom A, Dalen J, Mamolo C, Cappelleri JC, Petersson IF, Stahle M. Treatment patterns with topicals, traditional systemics and biologics in psoriasis - a Swedish database analysis. *Journal of the European Academy of Dermatology and Venereology* 2015; 29: 215-223.

Yin X, Low H, Seielstad M, Liao W, Stahle M, Franke A, Zhang X, Liu J. Trans-ethnic genome-wide meta-analysis identifies multiple novel associations and reveals ethnic heterogeneity of psoriasis susceptibility. *Journal of Investigative Dermatology* 2015; 135: S74-S74.

Yin XY, Low HQ, Wang L, Li YH, Ellinghaus E, Han JL, Estivill X, Sun LD, Zuo XB, Shen CB, Zhu CH, Zhang AP, Sanchez F, Padyukov L, Catanese JJ, Krueger GG, Duffin KC, Mucha S, Weichenthal M, Weidinger S, Lieb W, Foo JN, Li Y, Sim K, Liany H, Irwan I, Teo Y, Theng CTS, Gupta R, Bowcock A, De Jager PL, Qureshi AA, de Bakker PIW, Seielstad M, Liao W, Stahle M, Franke A, Zhang XJ, Liu JJ. Genome-wide meta-analysis identifies multiple novel associations and ethnic heterogeneity of psoriasis susceptibility. *Nature Communications* 2015; 6.
