

CERIC seminars Fall 2009

The hosting CERIC Principle Investigators for each seminar date is provided below. Unless otherwise noted, all seminars are located in the CMM Seminar Room (L8:00) from 15:00-16:00 with refreshments served both before and after the seminar.

August 28th CMM

Kutty Selva Nandakumar, Medical Inflammation Research Unit, Medical Biochemistry and Biophysics, Karolinska Institute

Antibodies mediating arthritis

Host: Rikard Holmdahl

September 4th CMM

Bob Harris, Department of Clinical Neurosciences, Karolinska Hospital

Activating macrophages to cause or cure autoimmune diseases

Host: Tomas Olsson

September 11th CMM

Method Seminar

Liv Eidsmo, Department of Medicine, Karolinska Institutet

Dendritic cells in psoriasis

Host: Mona Ståhle

September 18th CMM

No seminar

Host: Lars Klareskog

September 25th CMM

Anders Mälarstig, Cardiovascular Genetics Group, Atherosclerosis Research Unit, Department of Medicine, Karolinska Institutet.

Molecular Genetics and Coronary Artery Disease: Identification of new pathways for chronic inflammation in atherothrombosis

Host: Anders Hamsten

October 2nd CMM

Method seminar

Alexander Espinosa, Department of Medicine, Karolinska Institutet

Principles of making genetically modified mice

Host: Marie Wahren-Herlenius

October 9th CMM

Stipan Jonjic, Department of Histology and Embryology, Medical Faculty, University of Rijeka

Activation and inhibition of NK cells by murine cytomegalovirus - dual function of viral m04 protein?

Host: Cecilia Söderberg-Naucler

October 16th CMM

John Andersson, Institutionen för Medicin, Enheten för experimentell kardiovaskulär forskning, Karolinska Institutet

The lifestyle of CD4⁺FoxP3⁺ regulatory T cells and how peripheral tolerance can be exploited for therapeutic purposes

Host: Göran Hansson

October 23rd MBB

Candidate for CERIC B-cell immunologist research assistant professorship

Stephen Malin, Research Institute of Molecular Pathology, Vienna Biocenter

Interleukin 7 and lymphopoiesis

Host: Göran Hansson

October 30th Klämdag – No Seminar

November 6th CERIC External Scientific Advisory Board Conference

November 13th MBB

Maja Jagodic, Enheten för neuroimmunologi, Institutionen för Medicin, Karolinska Institutet

Epigenetics of inflammatory disease

Host: Tomas Olsson

November 20th CMM

Charles Bevins, Professor of Microbiology and Immunology, University of California Davis School of Medicine

Paneth Cell Defensins and Intestinal Inflammation: What's the Connection?

Host: Birgitta Agerbeth

November 27th CMM

Per-Johan Jakobsson, Enheten för reumatologi, Institutionen för Medicin, Karolinska Institutet

Treatment of inflammation by targeting microsomal prostaglandin E synthase

Host: Lars Klareskog

December 4th MBB

Roman Zubarev, Division of Biometry, Department of Medical Biochemistry and Biophysics, Karolinska Institutet

Towards Google-like tool in proteome research

Host: Jesper Haeggström

December 11th CMM

Anders Hamsten, Cardiovascular Genetics Group, Atherosclerosis Research Unit, Department of Medicine Solna, Karolinska Institutet

Novel susceptibility genes/loci for cardiovascular disease. Two highlights from the past year

Host: Anders Hamsten

December 18th – No Seminar
