

CERIC seminars Spring 2009

The hosting CERIC Principle Investigators for each seminar date is provided below. Unless otherwise noted, all seminars are located in the CMM Seminar Room (L8:00) from 15:00-16:00 with refreshments served both before and after the seminar.

January 16th

Host: Göran Hansson

Mikael Karlsson, Clinical Allergy Research Unit, Department of Medicine, Karolinska Institutet

Scavenger receptors and NKT cells as regulators of innate B-cell activation

January 23rd

Host: Tomas Olsson

Margarita Diez, Neuroimmunology Unit, Department of Clinical Neuroscience, Karolinska University Hospital

Identification of genes regulating Herpes simplex virus type-1 encephalitis in rat

January 30th

Host: Mona Ståhle

Enikő Pivarsci Sonkoly, Molecular Dermatology Research Group, Center for Molecular Medicine, Karolinska University Hospital

microRNAs in skin inflammation

February 6th

Jesper Tegnér, Linköpings Institute for Technology and Karolinska Institutet

Decoding disease networks - algorithms and applications.

February 13th

Host: Lars Klareskog

Marie Gunnarsson, Institute of Environmental Medicine, Karolinska Institutet

Ischemic heart disease in Rheumatoid Arthritis- Observational studies in etiologic research

February 20th

Johan Björkegren, Center for Molecular Medicine, Karolinska Institutet

Transcriptional profiling of atherosclerosis - what is there to learn?

February 27th

Host: Anders Hamsten

Alexandra Bäcklund, Atherosclerosis Research Unit, Department of Medicine, Karolinska Institutet

Dissecting the connection between RA and atherosclerosis using mouse models

March 6th

Host: Jesper Haeggström

Hans-Gustaf Ljunggren, Institutionen för Medicin, Huddinge

New insights into the activation of NK cells upon target cell recognition

March 13th (Seminar at MBB)

Host: Birgitta Agerbeth

Jan Andersson, Department of Medicine, Center for Infectious Medicine and Division of Infectious Diseases

How important are the anti-inflammatory properties of statins?

March 20th

Host: Cecilia Söderberg-Naucler

Magnus Bäck, Institute of Medicine, Division of Experimental Cardiovascular Research, Karolinska Institutet

Leukotriene signaling in inflammatory diseases - Focus on atherosclerosis

March 27th

Host: Anders Hamsten

Jan Nilsson, Division for experimental cardiovascular research, CRC, Lund University

Lipoprotein autoimmunity - a novel target for prevention of cardiovascular disease

April 3rd

Host: Göran Hansson

John Andersson, Center for Molecular Medicine, Karolinska Institute

The lifestyle of CD4⁺FoxP3⁺ regulatory T cells and how peripheral tolerance can be exploited for therapeutic purposes

April 10th

Holiday – no seminar

April 17th

Host: Tomas Olsson

Fredrik Piehl, Neuroimmunology Unit, Department of Clinical Neuroscience, Karolinska Institute

The axotomy reaction revisited - unbiased genetics to elucidate mechanisms of relevance for neurodegeneration

April 24th

Darryl Zeldin, Laboratory of Respiratory Biology, National Institute of Health, National Institute of Environmental Health Sciences

The Cytochrome P450 Epoxygenase Family: Friend or Foe?

May 1st

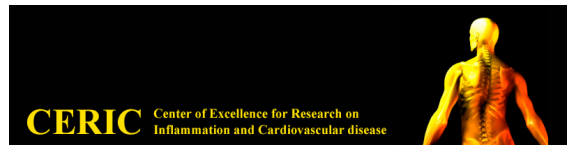

Holiday – no seminar

May 8th

Host: Lars Klareskog

Vivianne Malmström, Division of Rheumatology, Institute of Medicine, Karolinska Institute

T cell subsets and effector functions in rheumatoid arthritis

May 15th

Lars Alfredsson, Institutet för Miljömedicin, Division of Cardiovascular Epidemiology.
Title: *Do genetics have to care about the environment? Gene-environment interaction: concepts and analytical methods*

May 22nd

Holiday – no seminar

May 29th

Host: Marie Wahren-Herlenius

Alexander Espinosa, Rheumatology Unit, Center for Molecular Medicine, Karolinska Institutet

TRIM proteins in inflammation

June 5th

No seminar

CERIC annual retreat June 3rd! More information to follow....

Happy Summer!
